SUMMARY

Full-stack Software Engineer with 5 years in financial services, building on .NET, TypeScript, and React. Migrated and enhanced legacy PowerBuilder systems into modern React web applications and helped develop component architecture for other developers to build upon. Owned multiple platforms end to end, from initial design through production and new features. Consistently meets with business users to turn workflows into working applications.

EXPERIENCE

Software Engineer | Assured Guaranty, New York, NY *August 2021 - Present*

- **Reinsurance Platform:** Migrated proof of concept react application to new Module Federation architecture while maintaining business behavior on a modern, maintainable stack. Collaborated with other developers to define core components and design specifications for the team.
- **Deal Platform:** Re-platformed legacy PowerBuilder desktop application into a React web application that allows business to fill out deal information, handle calculations and signoffs, automatically. Designed and iterated each screen with business users to yield a more responsive application.
- **Finance Surveillance Platform:** Lead developer from design through production of a platform that reconciles partner records from separate datasets into one trusted record. Applied deduplication and validation rules to protect data integrity while incorporating snapshot and history features for reporting purposes.
- **Core Accounting Service:** Maintained and extended a long-lived accounting codebase. Responsible for implementing efficiencies such as detecting and moving work down to the correct layer and improving LINQ performance, shaving hours and preventing incorrect reports.

Software Engineering Intern *June 2021 - August 2021*

- Built a serverless Market Data Feed to ingest and parse high-volume fixed-income trade information using cloud serverless functions, managed SQL, and .NET.

M.I.S. Hospital Aide | NuHealth, East Meadow, NY *January 2021 - June 2021*

- Supported I.T. incident response and staffed the COVID-19 Vaccine Center front desk, assisting over 6,000 patients during the pandemic.

Internal Systems Temp | The NPD Group, Port Washington, NY *June 2019 - August 2019*

- Migrated JavaScript modules to Apex during the platform move from Salesforce Classic to Lightning, preserving existing behavior on a new framework.

EDUCATION

Stony Brook University, Stony Brook, NY *August 2016 - May 2020*

Bachelor of Science in Computer Science

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Java, Python, SQL, HTML, CSS

Frameworks & Libraries: React 19, Next.js 15, React Hook Form, Zod, TanStack Query, Zustand, MUI, Vite, Module Federation, .NET 8 / ASP.NET Core, Node.js, Express.js, Entity Framework, MediatR, SignalR

Databases: MongoDB, SQL Server, Oracle, MySQL

Tools: Docker, Git, CI/CD, REST APIs, Jest, Cypress
